File

Dear Sir:

Enclosed are copies of (Drawings Nos. D-5901-A (Incinerator) and C-5902-A (Liner and Interior of Incinerator), which show the design of the Task Order No. Z unit as formulated to date.

All of the details of the charging door are not shown on the drawings. We have not yet arrived at a simple, light-weight design that we feel is needed for this component.

We would appreciate receiving your comments on the design as soon as possible.

Sincerely, /

25X1

SECTION B-B

9' 4" 5'

1' 5" 8 1/2"

15 3/4" O.D. Steel Members

16" O.D. Stack

22" O.D. Grid

39" O.D. Radiation Shield

40" O.D. Shell

42" O.D. Flange

SECTION A-A

Technical drawing showing a semi-circular structure, likely a culvert or tunnel, with a cross-section view labeled SECTION A-A. The drawing includes dimensions: 18'0.0" for the radius and 5'0.0" for the width of the structure. The cross-section view shows a semi-circular profile with a flat top and a vertical wall on the right side. The drawing is a black and white line drawing with dimension lines and labels.
